FLOOD AND HIGH WIND SAFETY
WSDOT
WET WEATHER DRIVING TIPS:
Slow down
Leave extra room between cars
Allow extra time to reach destinations
Turn on headlights
Watch for water pooling on the roadway
Turn off cruise control
Obey detour and closure signs. NEVER drive around a barricade.
6 INCHES
of water is enough to knock a person down and will stall most vehicles.
1 FOOT
of water can make you lose control of your vehicle.
HYDROPLANING RECOVERY
Don't panic
Avoid hard breaking and quick turns
Ease off gas, lightly pump brakes (or use consistent pressure if ABS)
2 FEET
of water can sweep a vehicle away — even SUVs and trucks.
Can't see the road, don't drive through the water.
If floodwaters surround your car but the water is not moving, abandon your car, seek high ground and call for help. If water is moving, do not leave your car.
DOWNED POWER LINES
Stay far away from downed power lines and call 911.
Always assume a power line is live.
Do not touch anything or anyone in contact with a fallen power line or other equipment.
If a downed power line touches your car, stay inside. Honk your horn, roll down your window and call for help or call 911. Wait for fire department or utility workers to tell you it's safe to exit.
If you must leave due to fire risk: remove loose clothing, jump clear of the vehicle so you're not touching the vehicle when you land; shuffle away without picking up your feet.
TURN AROUND, DON'T DROWN
Do not drive or walk through standing water if you can't tell how deep it is. Water hides missing or washed out pieces of road.
